

GIS CENTER OF EXCELLENCE

The trusted partner for Field Service Management mission critical operations

Providing high-value services from the combination of 20+ years experience in Field Service Management (FSM) and Geographic Information System (GIS)

OverIT Next-Gen FSM Platform

Organizations manage a high volume of infrastructures that are geographically dispersed in the field. A key operation is related to the maintenance or expansion of networks, cables, valves, joints, electricity, and water meters, which are very often located underground and therefore not visible to the naked eye. How to visualize these assets and the related information, analyzing and evaluating the asset conditions prior to performing any operations?

Leveraging the industry expertise of its GIS (Geographic Information System) Center of Excellence, OverIT confirms itself as a long-standing reference point for implementing GIS solutions in business. As proof of its competence, the Next-Gen FSM Platform provides the ultimate of support for infrastructure maintenance activities, as to provide the best possible support to its customers.

GIS & FSM

Deep integration with GIS features, both on back-end and on mobile, even offline. Work orders, asset data, customer information, and all field service details are displayed in a single map-based view.

MOBILE OFFLINE

Work management both online and offline, as to enable the resources to complete and debrief activities, even when operating disconnected.

GIS INTEGRATION WITH INNOVATIVE TECHNOLOGIES

Deep integration of GIS with BIM, IoT, and AR to streamline mission-critical maintenance and inspection tasks leveraging the potential of cutting-edge technologies.

GIS Center of excellence

End-to-end GIS high-value services across the entire FSM project journey

CONSULTANCY AND ASSESSMENT

Leverage the experience of our experts to transform your Field Service Management processes and manage linear assets by creating innovative GIS solutions on premise, in the cloud and on mobile devices.

SOLUTION DESIGN

Shape or reengineer your tailor-made GIS solution to boost your Field Service Management operations. Our experts provide deep industry, process and technical expertise gained in 300+ customer implementations.

INTEGRATION AND DEVELOPMENT

Harness our expertise in the implementation phase: development methodologies and frameworks, data migration and tuning, geo-processing and tools, architectural and infrastructural design.

GIS - INTEGRATION WITH FSM SOLUTIONS

Asset display (backend and mobile)
Scheduling
Field Collaboration/AR

GIS - CROSS INDUSTRY SOLUTIONS

Network design and editing
Emergency response
Asset interaction management
Historical and real-time asset monitoring
Hydro-geological

ENERGY & UTILITY

OIL & GAS

TELCO

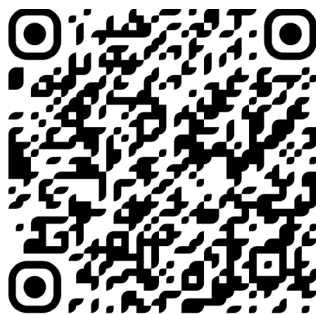

TRANSPORTATION
